DETAILED ACTION

1. Amendment received on May 28, 2008 has been acknowledged. Amended claims 1-5 and 7-11 have been entered and canceled claims 6 and 12-15 are acknowledged. Therefore, claims 1-5 and 7-11 are pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Amy Thekdi on August 14, 2008.

The application has been amended as follows: on lines 1-2 of claims 4, 8, and 9, the term "the short butting wall" will read "the butting wall" as in claim 1.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: refill containers for cosmetics are known in the art. Refill cases are disclosed having a case body which stores a middle or refill plate and a cap detachably fitted to the case body by screw engagement. The use of ring-shaped gasket made of a soft, elastic material and fitted to the underside of the roof of the cap to create an airtight seal is also known. The prior art also discloses the use of a butting wall disposed on either one of the base body

or the cap to control the contact deformation of gasket by stopping the screw engagement between the cap and the case body at the desired point. However, the prior art does not disclose the gasket including a main portion which comes into contact with the brim of the middle plate and a fitting portion disposed on the inward side of the main portion used for fitting to the cap where the gasket is fitted to the cap in an undetachable manner but in a state having play relative to the roof. Additionally, the prior art does not disclose the fitting portion being disposed between the roof of the cap and a gland which is fixed to the roof. These characteristics are recited in the independent claim 1. Claims 2-10 are dependent on claim 1 and include the two portions of the gasket as well as the gland.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The U.S. Patent No.'s 3311248 to Marchant, 6988630 to Matsumoto, and 4310101 to Sekine are storage containers with similar disclosure and claiming similar apparatus except for configuration of the two portion gasket and the gland. Marchant discloses the case body, middle plate including a cosmetic item, and cap arrangement where the case body and cap are fitted together in screw

engagement; however, Marchant does not disclose the gasket or butting wall as disclosed by Applicant. Sekine discloses a storage container a gasket formed of a soft, elastic material fitted to the underside of the roof of the cap and a butting wall for limiting the elastic deformation of the gasket. Additionally, Matsumoto discloses a storage container having a cap and case body fitted together in screw engagement where the case body has a double-wall structure and a gasket. Despite the similarities as described above, Sekine and Matsumoto do not disclose the two portion gasket and gland configuration.
